

# ANDHYKA HENDRA KURNIAWAN

**Backend Engineer | Enterprise Systems & Modern API Development**

---

**Pasuruan, East Java, Indonesia** | **Email:** andhyka218@gmail.com | **Phone:** 0822-3291-8744 | **LinkedIn:** [www.linkedin.com/in/andhyka-hendra-kurniawan](https://www.linkedin.com/in/andhyka-hendra-kurniawan) | **Born:** Pasuruan, 19 July 1999

## PROFESSIONAL SUMMARY

Backend Engineer with 4+ years of experience building and maintaining enterprise-grade backend systems in banking and web environments. Experienced in handling transactional credit card processing systems using COBOL and DB2 in production environments. Strong background in REST API development using PHP (CodeIgniter) and Java (Spring Boot), with solid understanding of system integration between legacy mainframe architecture and modern API-based applications. Focused on building reliable, scalable, and maintainable backend systems.

## TECHNICAL SKILLS

### Core Backend & API

- Java (Spring Boot)
- PHP (CodeIgniter 3 & 4)
- RESTful API Design
- JWT Authentication
- Relational Database Design
- Business Logic Implementation

### Enterprise & Mainframe

- COBOL
- IBM DB2
- VSAM
- Credit Card Processing Systems
- Production Incident Handling

### Databases

- MySQL
- Oracle (basic)
- PostgreSQL (basic)

### Tools

- Git
- Postman
- Hummingbird Terminal Emulator

## **WORK EXPERIENCE**

### **Backend Developer | PT Indocyber Global Teknologi – Client: Bank Negara Indonesia (BNI)**

**Jan 2022 – Dec 2025**

- Maintain and enhance credit card processing backend systems in a production banking environment using COBOL and DB2.
- Analyze business requirements and implement technical adjustments to existing backend logic, including authorization validation changes.
- Support transactional data processing and reporting systems to ensure data consistency and operational reliability.
- Collaborate with QA, Operations, and system users during testing and production deployment cycles.
- Provide production support and incident handling under operational and SLA constraints.

### **Assistant Lecturer | Universitas Atma Jaya Yogyakarta**

**Jan 2021 – Jul 2021**

- Assisted in teaching Website-Based Information Systems and System Analysis & Design Project courses.
- Guided 50+ students in backend web development using CodeIgniter 3.
- Evaluated student projects and provided technical feedback on database design and system architecture concepts.

### **Freelance & Academic Projects**

**Aug 2019 – Jun 2021**

- Designed and developed RESTful APIs and fullstack applications using PHP (CodeIgniter) and MySQL for academic and organizational systems.
- Implemented JWT-based authentication and role-based access control, ensuring secure API access and structured workflow handling.
- Designed relational database schemas and managed data validation logic to maintain consistency across modules.
- Delivered end-to-end backend solutions, from requirement analysis and system design to deployment and iterative enhancement.
- Initiated and led a web development learning program, mentoring backend-focused teams and contributing directly to production-ready campus systems.

## **PROJECT EXPERIENCE**

### **Laboratory Management System (APPSI DATALAB)**

**Feb 2020 – Aug 2021 | PHP, CodeIgniter 3, MySQL**

A campus-integrated system consisting of three main modules: Laboratory Management (DATA LAB), Academic & Internship System (SIBIMA), and Alumni Tracking (TRACER)

- Co-initiated and developed DATA LAB as a proof-of-concept system to support laboratory inventory and management for the study program.
- Participated in requirement analysis, database schema design, and fullstack implementation within a 5-member founding team.
- Contributed to system evolution into APPSI platform, integrating multiple academic modules under a unified web system.
- Led backend development for SIBIMA and TRACER modules within a 3-member team

(Backend, Frontend, QA).

- Designed RESTful backend logic, database relationships, and workflow handling for academic, internship, and alumni data management.
- Supported QA validation and iterative feature expansion based on institutional requirements.

### **Cancer Foundation Website (RUMAH KANKER)**

**Mar 2021 – Jul 2021 | PHP, CodeIgniter 4, MySQL**

- Conducted formal requirement analysis with foundation stakeholders to identify operational gaps in the existing website.
- Designed and implemented new backend and frontend features to support patient data management and administrative workflows.
- Extended existing system architecture while maintaining compatibility with previously deployed components.
- Structured database enhancements and implemented access control logic for sensitive data handling.
- Delivered fullstack implementation as part of undergraduate thesis completion.

### **Intellectual Property & Registered Works**

- **DataLab** – Registered Computer Program (Directorate General of Intellectual Property, Indonesia)  
Registration No: 000180464 (2020)
- **Database For N00b – Registered Educational Module**  
Registration No: 000196064 (2020)
- **CRUD For N00b With CI – Registered Educational Module**  
Registration No: 000195864 (2020)

### **EDUCATION**

**Bachelor of Computer Science – Information Systems**

**Universitas Atma Jaya Yogyakarta | Aug 2017 – Jul 2021 | GPA: 3.22 / 4.00**

### **LANGUAGES**

- Bahasa Indonesia (Native)
- English (Proficient – Spoken & Written)
